

# ANUPAM RASAYAN INDIA LIMITED

## Energy Management Policy

### **Purpose:**

Anupam Rasayan India Ltd. strives to use energy in the most efficient, cost effective, and environmentally responsible manner. The purpose of this policy is to optimize energy use throughout organization, improve cost-effectiveness and productivity, enhance working conditions, reduce greenhouse gas emissions, contribute to sustainable development and control the waste associated with the energy usage.

### **Responsibility:**

Each and every employee including the site contractors and suppliers are responsible to conserve and efficient use of energy

### **Policy:**

We will promote the efficient use of energy and related practices throughout our workplaces and process to be energy efficient and greener organisation. To implement this policy, we will:

- Achieve and maintain compliance with applicable legal and other requirements.
- Continuously improve energy efficiency by establishing and implementing strategic energy management practices that support manufacturing and service capabilities while providing a safe and comfortable work environment.
- Consider energy efficiency as a factor in product development and in process and facility design and in the procurement of goods and services.
- Adopt the green energy/Renewable energy sources to achieve environmental sustainability.
- Encourage continuous improvement in energy conservation by employees and supply chain
- Use energy consumption data to establish Key Performance Indicators (KPIs) to drive performance improvements. We will measure, review and communicate our progress on a regular basis to ensure availability of information to our employees.
- Ensure adequate resources are available to work towards achieving energy KPI goals.
